

Student Name: _____

Grade: _____ Date: _____

1. The voting paper for the Australian election is 95 cm wide, but the little booth for the voter to stand in is just 40 cm wide. How much wider would the booth have to be to allow the voter to spread the voting paper out flat?

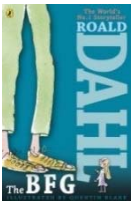

2. For the elections, the big ballot paper measures 95 centimetres across. How many millimetres is that?

3. Fran's favourite breakfast cereal Weet-Bix costs \$4.50 for a 1.2 kg box. The same box is selling to overseas buyers for \$50 per box. How many boxes at our price in Australia could be bought for \$50?

4. The election next weekend was announced 8 weeks ago. How many days are there in 8 weeks?

5. The new Disney movie "THE BFG", released in June 2016, is based on a short story written by Roald Dahl way back in 1975, called "Danny, the Champion of the World". How many years ago was that?

6. Josh's mum buys him five pairs of socks. One pair costs \$2.85, but a 5-pair pack of socks costs \$6.50. How much does she save by buying the pack?

7. If Peppa Pig eats 2 apples each day, how many apples will she eat in 4 weeks?

8. Milk is selling at \$2 for 2 litres at many supermarkets. Some people are choosing to pay \$3 for 2 litres, with the extra money going to the very deserving, hard-working dairy farmers. If in one week a family buys 12 litres of milk at the more expensive price, how much extra are they paying?

9. When it was released, the first "HOME ALONE" movie topped the movie ratings for 12 weeks in a row. How many days are there in 12 weeks?

10. TV ratings for Masterchef last Tuesday showed 1,040,000 viewers. On Wednesday, Masterchef had 1,062,000 viewers. What is the difference between these two numbers?

11. Open-Ended Question: The answer to a mathematics problem is 29. What could the question be?

ANSWERS – EdShop Mid-Primary Worded Worksheet MP 23 16
